Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of making a composite panel with an insert member, classified in class 156, subclass 303.1.
- II. Claims 11-18, drawn to a composite panel with an insert member, classified in class 428, subclass 133.
- III. Claim 19, drawn to a method of joining an insert with a panel by insertion of a tab, classified in class 29, subclass 428.
- IV. Claim 20, drawn to composite panel with an inserted tab, classified in class 428, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Groups I and II; and Groups III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. In Groups I and

Art Unit: 1772

II the formed sheet is joined to the substrate by use of adhesive or deformation of the bosses, while Groups III and IV join the formed sheet and substrate by the use of tabs.

3. Inventions Group II, claims 11-18 and Group I, claims 1-10 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed could be made by joining the substrate and topography sheets before forming the topography, then embossing the laminate to deform a boss through an opening in the substrate.

4. Inventions Group III, claim 19 and Group IV, claim 20 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the formable sheet and

Art Unit: 1772

substrate sheet could be joined then a tab deformed by punching from the formable sheet into an opening in the substrate in order to make the product by an alternate process.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and since the fields of search are not co-extensive, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. Pete Kiouisis on 17 April 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1772

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 703-308-4251. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
